CONTENTS

Page No.

2D NMR Applied to Dynamic Stereochemical Problems 1
by R. WILLEM

Application of ^{1}H, ^{13}C and ^{15}N NMR in the Chemistry of 1,4-Diazines 95
by O. N. CHUPAKHIN, V. N. CHARUSHIN and A. I. CHERNYSHEV

Isotope Effects in Nuclear Shielding 207
by P. E. HANSEN

NMR Methods for Measuring Enzyme Kinetics *in vivo* 257
by K. M. BRINDLE

The Superspin Formalism for Pulse NMR 295
by A. D. BAIN

Optimal Design of Relaxation Time Experiments 317
by G. H. WEISS and J. A. FERRETTI

^{13}C Labeling in Studies of Metabolic Regulation 337
by R. E. LONDON

The Tube Concept of Macromolecular Liquids in the Light of NMR Experiments 385
by R. KIMMICH, G. SCHNUR and M. KÖPF

Thallium NMR Spectroscopy 423
by J. F. HINTON, K. R. METZ and R. W. BRIGGS

Linear Prediction and Maximum Entropy Methods in NMR Spectroscopy 515
by D. S. STEPHENSON
